DESCRIPTION

The Apollo® Model DC4SG, DC4SGN Double Check Valve is designed to prevent contamination of the potable water supply due to back-siphonage or backpressure from substances that are non-health hazards. The modular check valves have replaceable seats and reversible EPDM seat discs. Grooved connections on an epoxy-coated ductile iron body allow for easy connection to butterfly valves or gate valves. Note: Model DC4SG replaces Model 4S-100 (also known as Model DC) in all sizes except 10".

FEATURES

- Lightweight
- · Short lay length
- Low pressure loss
- Modular check valves
- · Individual access to check valves
- · Corrosion resistant epoxy-coated ductile iron body
- US Patents #5,711,341 and #6,343,618
- MADE IN THE USA

FLOW CURVES

Notes:

- 1. Flow curves directly reflect data collected by USC's Foundation for Cross-Connection Control and Hydraulic Research Approval curve documents.
- 2. Flow curves shown were recorded with butterfly shut-off valves.*
- 3. All data points are based on USC increasing flow data, from zero GPM to rated flow (opening curve).
- 4. Refer to Apollo Model DC4S (Formerly 4S-100 Series) for 10" valve information.
 - * Flow curves with gate valves are slightly lower. Contact factory for more information.
