

# National Fire Equipment Ltd.

## 231 & 264 VALVE CONTROL

**MODEL 231 (SQUARE PLATE)**

**MODEL 264 (ROUND PLATE)**

National Fire's model 231 and 264 are valve control assemblies designed for non rising stem gate valves. They allow for operation of the gate valve from outside of a wall when the valve is located behind the wall. All fittings and adapters are made from cast brass and are also available in a chrome finish. This assembly works in connection with our model NRS gate valve, as well as our wall hydrant connections; model 294 (surface wye style) or model 230 (recessed style). Please see the diagram on the following page to see how these components work together to create a complete wall hydrant.

SHOULDER ADAPTER

CAVITY CAP

COUPLER

CONTROL NUT

SQUARE PLATE (FOR #231)

ROUND PLATE (FOR #264)
