PLASTIC STANDPIPE NOZZLE

Description

A fog nozzle is a firefighting hose spray nozzle that breaks its stream into small droplets. Fog nozzles play an important part in firefighting tactics due to their versatility. By doing so, its stream achieves a greater surface area, and thus a greater rate of heat absorption, which, when compared to that of a smoothbore nozzle, speeds its transformation into the steam that smothers the fire by displacing its oxygen.

A7BP 1 1/2"

Plastic Nozzle in ABS with adjustment from full fog to shut-off with rubber bumper, with main feature as following:

- 1 1/2" hose thread
- Rated pressure 100 psi
- FM approved, UL & ULC listed

Approvals: A7BP
