

National Fire Equipment Ltd.

ANTIFREEZE TESTERS

MODEL MT-757ADATC
FOR USE WITH PROPYLENE GLYCOL

MODEL MT-055ATC
FOR USE WITH GLYCERIN

National Fire's model MT-757ADATC and MT-055ATC are handheld refractometers designed for either propylene glycol or glycerin. These highly sensitive tools measure the percentage of antifreeze in sprinkler and standpipe systems. Comes complete with carrying case, eyedropper and precision screwdriver. Ensure your system complies with NFPA recommendations for antifreeze concentrations and prevent costly freeze-ups and subsequent leaks and damage.
