

# SNAP GROOVE

The new roll-grooving machine.

*From the team behind the SnapDrill pipe hole cutting machine...*

**Introducing true hand-held and automatic grooving.**

Up to SCH40 4-inch pipe. 13 kgs (28lbs) per unit. Groove within seconds.  
Instead of making a one size fits all, we have made it per size of pipe, allowing for pre-setting the depth. Saving you time, and making the most user friendly machine.

***Launch date in 2026 TBA***
