

National Fire Equipment Ltd.

STAINLESS STEEL FRONTS

FULL GLASS

FULL METAL

NOT ALL STAINLESS STEEL CABINETS ARE THE SAME

Lower grades of stainless steel can appear dull and grey with visible spot welds. Stainless Steel Fronts from National Fire Equipment Ltd. are constructed of top quality 304 Stainless Steel. The No.4 Satin Finish is applied to the door and frame after fabrication removing all spot welds and surface imperfections. The final product has a uniformed brighter satin finish for the best appearance.

(Take the magnet test. A magnet will stick to most lower grades of stainless steel)

National Fire Equipment's cabinets come standard with flush stainless steel door latch. Made of all metal parts (no plastic). No visible mounting screws as all mounting hardware is located behind the door. Completely flush for a safe and attractive installation.

Fully concealed SOSS hinges gives cabinets a clean crisp appearance. All NFE stainless steel hose and extinguisher cabinets are standard with concealed "SOSS" hinges so the face of the cabinet can be polished without any obstructions.
