

HYDROSTATIC TEST PUMPS

FH Series

FIRE HOSE TESTERS

The FH-series line of fire hose testers, offers testing pressures up to 1,000 PSI, with flow rates up to 10 GPM. Gas, Electric, and Diesel driven models, designed to safely test fire hose up to 6" in diameter. A large 2 & 1/2" swivel inlet aids in the ability to quickly fill and bleed the fire hoses through the large 1 & 1/2" heavy duty manifold, with independently controlled stainless steel ballvalves. NO WILD LINES - unique to the RICE Hydro line of fire hose testers, a ballvalve strategically placed on the inlet piping allows the user to fill with "LARGE VOLUME at LOW PRESSURE" and test with "LOW VOLUME at HIGH PRESSURE", eliminating the elements that may cause wild lines. The FH-series hose testers, meet or exceed test standards set forth by the NFPA 1962. A safe, less costly and more efficient way to test your fire hose, keeping your pumper ready for action, where it should be!
