

National Fire Equipment Ltd.

STRUCTURE ATTACHMENT FITTINGS

FUNCTION:

Designed for bracing pipe against sway and seismic disturbances.

Universal swivel design allows for attachment at any surface angle combined with concentric loading. Structure attachment fitting designed to use 1" thru 2" SCH 40 pipe, structural steel, and PHD 12 gauge strut channel (1001 & 1201) as sway bracing elements. No bracing member thicker than 3/8" can be used in conjunction with this product. Utilize the Fig. 030 with a PHD Manufacturing pipe attachment fitting and a bracing

element to form a complete sway brace assembly. Sway brace assemblies are intended to be installed in accordance with NFPA 13 and the

manufacturer's installation instructions.

SIZE: 1/2" mounting hole

Braces up to 8" Pipe MAX

FINISH: Electro-galvanized

MATERIAL: Ductile Iron and Low Carbon Steel

INSTALL: Mount device to structure then insert brace element into fitting against

back of jaw. Tighten set screw finger tight, then tighten until hex head

breaks off. Adjust attachment to proper brace angle.

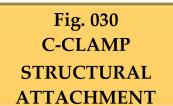

APPROVALS: Underwriters Laboratories listed for US and Canada

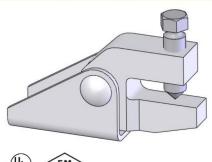

Factory Mutual approved

Listed for use with NFPA fastener tables and PHD sway brace

components only

ORDERING: Specify figure number
