#PLAYPIPE

- Swivel handle, red marlin trim
- Maximum operating pressure: 100 PSI (water only) at 70° F (21° C)
- UL/ULC FM Approved
- Comes with standard 1-1/8" orifice tip
- Other tips available (special order)
- Available in a variety of Canadian hose threads

#NFE-101

Solid steel dechlorinating diffuser for testing hydrant and hose flow without damaging or destroying surrounding property. Complete with inner feed tube for administration of dechlorination tablets and a port for pressure testing. The large square cone shape allows the water to be dispersed harmlessly in a wide pattern. Available in all major Canadian hose threads.

Comes complete with hose thread adapter
