Series TK-DL Backflow Preventer Test Kit with Digital Print-Out and Download Capability

Model TK-DL Backflow Preventer Test Kit with Download Capability is a compact portable device made for testing pressure vacuum breakers, reduced pressure zone assemblies, and double check valve assemblies. The TK-DL replaces both pressure and differential test gauges featuring powerful microprocessors and a compact size. High-side, low-side and differential pressure are continuously displayed and recorded in the unit's 32K memory. Model TK-DL also provides printed, on-site documentation, recording time, date, and verified test results. The TK-DL hold 50 three-minute tests in its memory (or 75 shorter tests) which allows you to access and print your records whenever you like or transfer the data to your computer for permanent storage. Model TK-DL self-calibrates prior to each test and provides +/- 0.2% accuracy in addition. The TK-DL is backed by a full one-year warranty.

TK-99D

Features

- Set of Brass Adapters
- Three 6 ft. (1828mm) color-coded hoses
- Digital print-out unit
- NiCad batteries
- AC battery charger
- RS232 serial port
- Computer cable
- Software for downloading test results to PC system
- Carrying case with handgrip and shoulder strap
- Operating Manual
- One-Year Warranty

NOTE: Software is not Microsoft® Windows compatible. (DOS Only)

Materials

Adapters: Brass
 Hoses: Plastic
 Batteries: NiCad

Durable carrying case available separately
